## RESEARCH INTERESTS

---

- Extended Reality [J3, J7, J8, J9, J10, U5]
  - Exploring the integration of eXtended Reality (XR) into spatial design evaluation to examine how built environments influence occupant responses. Employing both self-reported measures and physiological data (EEG, HRV) to quantify the relationship between environmental features and human experience.
- Artificial Intelligence
  - Applying natural language processing, image processing, and transformer-based models to interpret user intent and automate aspects of spatial design and design communication.
- Project Management [J5, J6, U1, U2, U3, U6]
  - Analyzing stochastic management data in construction projects, characterized by their temporary nature, diverse stakeholders, and labor-intensive processes, by implementing machine learning algorithms to interpret complex interconnections.

## EDUCATIONS

---

<b>Ph.D.</b> Hanyang University	2026
Department of Architectural Engineering	
<i>Dissertation title: "A User-Centered Spatial Design Revision Framework using Affective Engineering and Transformer-based Emotional Requirement Interpretation"</i>	
<b>M.S.</b> Hanyang University	2022
Department of Architectural Engineering	
<b>B.S.</b> Hanyang University	2020
Department of Interior Architecture Design	

## EXPERIENCES

---

<b>Teaching Fellow</b> , Hanyang University	2024–2026
Department of Architectural Engineering	
<i>Computer Engineering</i>	Spring 2026
<i>Architectural Engineering Capstone PBL</i>	Fall 2025
<i>Computer Engineering</i>	Spring 2025
<i>Computer Engineering</i>	Spring 2024
<b>Internship</b> , SIFC Property Korea YH	2019–2020
- Property management for IFC Seoul, including a IFC Mall (85,444m <sup>2</sup> GFA), three IFC Seoul Office Towers (329,586m <sup>2</sup> GFA), and Conrad Seoul Hotel (five-star hotel)	
<b>Undergraduate Research Student</b> , Hanyang University	2019
Hanyang University, Department of Interior Architecture Design	

## RESEARCH PROJECTS

---

**Hanyang University, Department of Architectural Engineering** 2021–2026

**Research Manager, extended reality and occupant behavior**

- Study on Quality Control of Educational Facilities using Virtual Environments. 2023–2024
- Development of Decision-making Framework to Support Personalized Spatial Composition based on Temperament, Perception and Bio-markers Applying Digital Twin. 2021–2024

**Research Participant, construction management and on-site quality control**

- Development of Artificial Intelligence-based Real-Time Construction Quality Management System. 2024–2026
- Construction Quality Control using Digital Twin Technology. 2021–2022
- Establishment of Standard Guidelines for Daycare Centers in Police Stations. 2021

**Hanyang University, Department of Interior Architecture Design** 2019

**Research Student, data collection and analysis**

- Spatial Preference Modeling based on Immersive Virtual Environment and Choice Modeling Theory. 2019
